Safety information

Operation-fields and applications

Goodbye to stress

RelaxoDog® will successfully avoid various stressors, like:

Training Stress

Aggressiveness

Anxiety

General Reassurance

Change of Ownership

Destructive Behavior

Misbehaving

Fireworks

Thunder

Panic

Hyperactivity

Inadequate Social Behavior

Marking Behavior

Hierarchy problems

Fear of Travel

Constant Barking

Separation anxiety

Environmental Changes

Compulsive Behavior

and much more

Important note:

RelaxoDog® is only to be used on dogs.

RelaxoDog® is not a substitute for a veterinary diagnosis and treatment of diseases.

In case of health problems, consult your pet's veterinarian!

Functional description:

This is how, the all-in-one solution works for deep relaxation of your dog.

RelaxoDog® is the world's first and unique device ensuring unconscious deep relaxation for all dogs. It has been specifically adopted to the sensitive hearing of dogs, and was developed in close cooperation with veterinarians, behavioral therapists and breeders.

RelaxoDog® is not comparable to conventional relaxation music for animals, because in addition to audible, specially composed soundwaves, RelaxoDog® also features an additional six (6) subliminally recorded tracks that are not consciously detectable to the human ear, and put the dog into a deeply relaxed, comfortable condition.

Moreover, RelaxoDog® features the ability to completely suppress sound waves audible to humans, meaning that RelaxoDog® works exclusively with inaudibly recorded, silent and subliminal music tracks that are not consciously perceivable.

RelaxoDog® operates fully automatically and effectively. Regardless of the age or breed of your dog, both indoor and outdoor. The ideal companion for traveling and all changes of environment, unfamiliar to your pet. RelaxoDog® runs by a powerful battery that doesn't need to be connected to the electrical circuit for 14 hours.

Before every flight, the special electronics run self-diagnostics. Once you hear the soundwaves after the start-up and the blue LED lights up, you will see that the self-diagnosis has been successful and RelaxoDog® is now ready for operation.

If you ever hear a "strange noise" in the audibly composed soundwaves, this is not a defect, but rather a quality feature of high frequency, saved audio tracks.

Interesting Facts and Important Tips

Everything you need to know about your new RelaxoDog® relaxation coach

RelaxoDog® is not a replacement for an animal-friendly education and attitude.

Please give yourself and your pet a little time to get used to this new deep relaxation system and make sure you don't abruptly start sport activities, such as training, agility, sporting, rescue or search and service activities after deep relaxation training with your RelaxoDog®.

Turn off the sound device at least 30 minutes before next active interaction with your dog.

We kindly ask you to consider RelaxoDog® can also cause deep relaxation-effects by its own audible sound patterns to humans.

Lithium ion batteries

Correct use of the integrated lithium-ion rechargeable battery

It is important that you fully charge the RelaxoDog® Sound Module before using it for the first time in order to generate the full capacity of the lithium-ion battery.

Charging options for the RelaxoDog® Sound Module

RelaxoDog® has a permanently integrated rechargeable battery that will operate for up to 14 hours (depending on the volume and ambient temperature) and can be charged with the mains units that are included in the delivery.

The Sound Module may be used constantly while charging during travel or transportation (12V).

About 30 minutes before the end of the battery operating time, the blue LED light will start to flash quickly to indicate that the RelaxoDog® battery will soon need to be charged.

Please only use the cables and mains sockets that are included in the delivery to charge the Sound Module.

Caution!

Avoid use in extremely cold or hot conditions, as this may reduce and limit the battery life. Please do not expose the sound module to temperatures of more than 45°C / 113°F, otherwise the built-in battery can be damaged.

Observe the special instructions for battery disposal law on page 13 of this manual.

The battery performance will vary depending on usage volume and outdoor temperatures.

Disposal of electrical and electronic equipment in the European Union

This product may not be disposed of with other waste. Instead, the user is required to dispose of the old appliance at a designated collection point for recycling of electrical and electronic equipment. The separated collection and recycling of your old device at the time of disposal will help to conserve natural resources and ensure that in its recycling, human health and the environment are protected. For more information on where you can hand in your old device for recycling, please contact your local municipal administration, your local home disposal service or the point of sale of your product.

Application

RelaxoDog® operates fully automatically, and it is important that you remain neutral and calm towards the dog when using RelaxoDog® for the first time. For the first few days of use, please set the audible mode to the normal volume.

Never start sonication in direct combination with an experience or event that is exciting for the dog, as this may initiate unwanted conditioning or exacerbate existing problems.

Positioning the RelaxoDog

Position RelaxoDog® Indoor within a maximum radius of 5 metres / Outdoor within a maximum of 3 metres (see sketch below) of the dog's main area, and make sure that your dog is unable to reach the RelaxoDog®.

Reaching a state of deep relaxation

The time it takes for the dog to reach a state of deep relaxation will vary depending on the initial situation and the sonication intervals. This depends on the starting situation and the level of severity of the particular stressor.

Please do not use any additional corrective measures during the initial sonication intervals.

Sonication period / intervals

The period of sonication may be up to 8 hours a day. Longer periods are absolutely safe, but should be avoided because of their relevance to the activity.

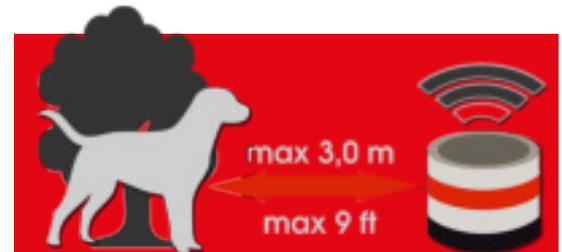

Volume control (audible sound mode)

Please note that dogs can hear up to 20 times better than humans. The factory settings in the audible sound mode are sufficient for a normal ambient noise level when starting the RelaxoDog®.

Please adjust the volume setting to the ambient noise level (+/- buttons) if required.

Range Indoor

Range Outdoor

Application

After only a short period of acclimatisation, it is possible to fully utilise the inaudible, subliminal high-frequency soundwaves (M mode).

Familiar and strange environments

If the dog is left alone at home or in a familiar environment after the acclimatisation period, then you can use the audible or inaudible soundwaves (M mode switch see page 7) in your absence.

However, please always start with a pre-sonication of at least 15 minutes before every absence.

We recommend only using the audible soundwaves in environments that are strange to the dog.

Despite it being in a state of deep relaxation, never leave your dog alone for longer than necessary.

RelaxoDog® is not intended as a means for extending absences.

240° wide-angle Speaker System

Animals that live outdoors

If the animal lives outdoors all year round, then problem-orientated sonication is safe for up to 10 hours a day.

However, in this special case, please ensure that the RelaxoDog® is aligned as centrally as possible.

Thunderstorms / fireworks

A dog's main area may change in a sudden event such as a thunderstorm or fireworks display.

Please use RelaxoDog® with the audible soundwaves directly at the dog's chosen place of well-being.

Transport and Travel

Travel Safely with RelaxoDog®

Mounting RelaxoDog® in car transports

With the included mounting strap, you can fix the RelaxoDog® case directly on the transport box or door.

Please make sure that RelaxoDog® is fully charged prior to departure or use the RelaxoDog® car adapter.

Mount RelaxoDog® on the outside of the transport box or door and use the included mounting strap which, as described above to the right, feed through the carrying handle in order to avoid the accidental opening of the RelaxoDog® function case.

The circular area should be directed at the dog, and in so doing, make sure to select the appropriate listening level before closing the case.

fixing details

fixing by handle

bottom detail

RelaxoDog® traveling by air

Please contact the airline prior to departure and point out that you want to use RelaxoDog® during the flight.

When doing so, you should submit the CE/FCC clearance certificate (page 16/17).

Due to the large number of airlines and varying transport conditions, we can not guarantee that the airline will tolerate transport with RelaxoDog®.

For any air travel, RelaxoDog® must be attached outside the transport-box and declared as a relaxation unit on the transport-box.

Please select the inaudible sound mode for the entire flight.

For all international transports, please make sure to observe the respective customs and country regulations, and ensure secure attachment of RelaxoDog® during all transports!

Tips and Troubleshooting

All RelaxoPet products are manufactured to the highest quality standards. If a problem that has not been listed here occurs, please email our customer service at service@relaxopet.com, indicating the error description.

General Safety Instructions

This appliance complies with all standards regarding electromagnetic fields (EMF). According to current scientific evidence, the device is safe to use, provided that it is handled properly and according to the instructions in this manual.

As with any other device, the proper handling is essential for a good result.

Opening the device leads to immediate loss of warranty.

Problem	Probable Cause	Solution
blue LED is not lit	<ul style="list-style-type: none">• battery is not charged• On/off switch is not activated.	Verify that the device has been charged using the various charging functions (power supply) and the on/off switch has been activated.

Dog is not relaxing	<ul style="list-style-type: none">• incorrect usage of device• reach too large• Veterinary illness	Please read page 9 and page 10 Please reduce the reach between the dog and the soundmodule. Please consult your vet

Safety Precautions

Please note before use

-  The device may only be used for the relaxation of your dog.
-  Please use the device only according to the instructions indicated. Do not use the device if it is damaged.
-  This device should not be used by persons (incl. children) with reduced physical, sensory or mental capabilities, or lack of mental capabilities, or lack of experience and knowledge, if appropriate supervision or instruction concerning use of the device has been ensured by a responsible person.
-  Ensure that RelaxoDog® is not accessible for the dog.
-  Do not hold the device directly to your ear when running. Otherwise, you risk damage of your hearing-ability due to the high sound frequencies.
-  Please refrain from using any scratching or abrasive cleaners that might scratch the surface, instead only use a soft, dry cloth.
-  Electrical components must not submerged in water and must be protected against moisture and extreme temperatures. If moisture gets inside the device, please contact your dealer before further use .
-  Never remove or modify any components or perform repairs by yourself, otherwise you run the risk of a fire hazard or danger of electric shock. If you have any questions, contact your dealer.
-  Never place the sound module on sloping and uneven surfaces. It could tip over, fall down and cause injury.
-  RelaxoDog® is not a toy! Ensure that children do not play with the device. Keep children away from the range of RelaxoDog®
-  RelaxoDog® is a precision instrument. Do not let it fall, and avoid shock and excessive force.
-  Keep children away from the packaging materials. Swallowing can cause suffocation

People with hearing loss should be careful not to turn RelaxoDog®

RelaxoDog® has been developed exclusively for the listening range of dogs and should not be used with other species.

Terms of Warranty

Warranty Period

RelaxoPet guarantees that the purchased product (product) is free from material and assembly defects. The guarantee period corresponds to the statutory regulations of the country where the product was purchased.

Warranty limitations:

(a) The guarantee is only applicable to the original purchaser (buyer) and cannot be transferred. The claim of the purchaser consists of repair or exchange under this warranty. The warranty only extends to products purchased from an authorized RelaxoPet dealer. Sales to third parties are not covered by this warranty. Warranty claims are only accepted if a valid receipt is provided. RelaxoPet reserves the right to change or modify this warranty without notice and if so, this then revokes the existing warranty.

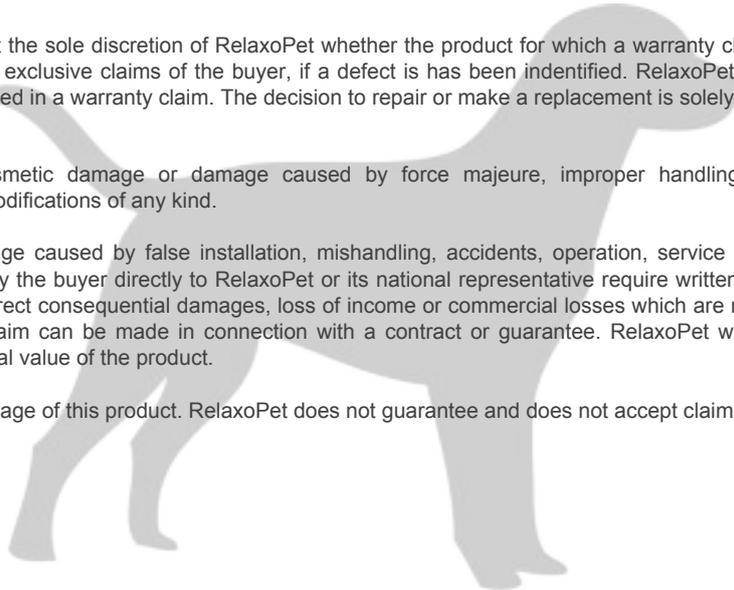

(b) RelaxoPet makes no guarantees for saleability of the product, nor for the abilities and the fitness of the consumer for a certain intended use of the product. The buyer is solely responsible for determining whether the product's capabilities and the intended application correspond

(c) Claims by the Purchaser - It is at the sole discretion of RelaxoPet whether the product for which a warranty claim has been identified, should be repaired or replaced. These are the exclusive claims of the buyer, if a defect is has been indentified. RelaxoPet reserves the right to examine any and all equipment that may be involved in a warranty claim. The decision to repair or make a replacement is solely up to RelaxoPet.

The warranty does not cover cosmetic damage or damage caused by force majeure, improper handling of the product, incorrect use of the product, commercial use or modifications of any kind.

The warranty does not cover damage caused by false installation, mishandling, accidents, operation, service or repair attempts that were not carried out by RelaxoPet. Returns by the buyer directly to RelaxoPet or its national representative require written damage limitation. RelaxoPet is not responsible for any direct or indirect consequential damages, loss of income or commercial losses which are related to the product in any way, independent of whether or not a claim can be made in connection with a contract or guarantee. RelaxoPet will also not accept claims from a warranty that go beyond the individual value of the product.

RelaxoPet has no influence in the usage of this product. RelaxoPet does not guarantee and does not accept claims for injuries or damages that occur as a result.

Terms of Warranty

Safety Precautions

This is a high quality RelaxoPet product and not a toy for humans or animals. This product is not intended for use by children without the supervision of a parent or guardian. The instructions contain safety instructions and regulations and instructions for the maintenance and operation of the product.

It is essential to read and understand these instructions before initial operation.

Only in this way mishandling and damage can be avoided. For questions or assistance, please direct inquiries to your local dealer and the point of sale, however the seller cannot make a warranty judgment without consulting RelaxoPet first. This also applies for warranty repairs. Therefore, contact the dealer who will quickly be in touch with RelaxoPet in order to make a proper decision to help you as soon as possible.

Repairs

If your product needs to be repaired, contact either your dealer or turn directly to RelaxoPet. Pack the product carefully. Note that the original box is generally not sufficient to avoid damage in shipment. Use a parcel service with tracking and insurance because RelaxoPet assumes no responsibility for the delivery of the product.

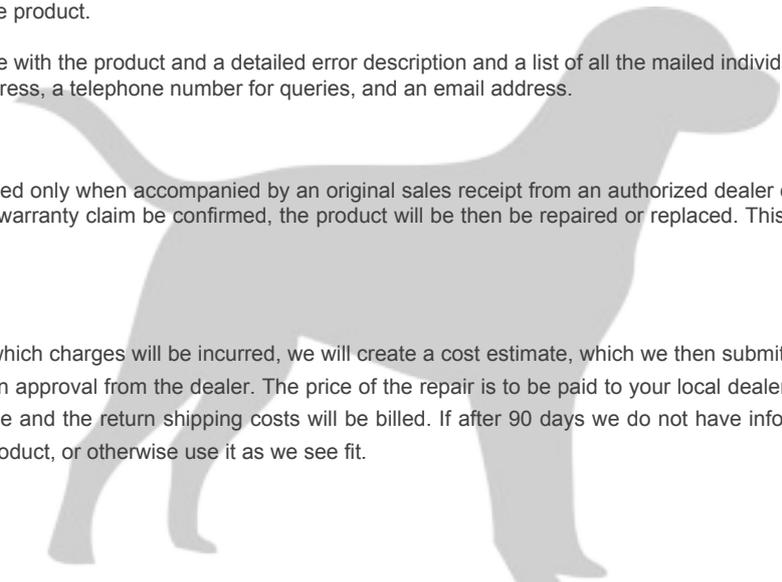

Please include a proof of purchase with the product and a detailed error description and a list of all the mailed individual components. Furthermore, we need the full address, a telephone number for queries, and an email address.

Warranty and Repair

Warranty requests will be processed only when accompanied by an original sales receipt from an authorized dealer corresponding to the purchaser and the purchase date. Should a warranty claim be confirmed, the product will be then be repaired or replaced. This decision will fall entirely to the discretion of RelaxoPet.

Chargeable repairs

If a repair needs to be made for which charges will be incurred, we will create a cost estimate, which we then submit to your dealer. The repair will only be made when we receive an approval from the dealer. The price of the repair is to be paid to your local dealer. With respect to paid repairs, at least 30 minutes workshop time and the return shipping costs will be billed. If after 90 days we do not have informed consent for a repair, we reserve the right to destroy the product, or otherwise use it as we see fit.
